

Google SketchUp Final Assignment

After learning how to use SketchUp and working through a number of tutorials and exercises to further develop your skills, you will now create your own design from scratch, choosing from the following options:

- 3D model of our school
- 3D model of your home exterior (complete with landscaping)
- 3D model of your dream home or famous building (complete with landscaping)
- Interior floor plan of a dream home, their home (complete with furnishings)
- 3D model of a famous bridge or landmark
- Related project that is preapproved

Please turn in 3 different views of your model. You will be graded according to the attached rubric.

To get an A, your model will:

1. Have many different shapes used to create the design
2. Be highly detailed
3. Have high quality landscaping or furnishings
4. Look like a real-life representation
5. Have all shapes will with appropriate textures
6. Be strongly creative
7. Have a very attractive design
8. Overall, have a high quality design

Please make sure your name and period is on each model view you turn in.
