

Adobe Flash

Individual Animation Project

The Flash individual project is your opportunity to create something of your own using Adobe Flash. The rules are simple. The first rule is the project is an animation. This simply means that it is not a simple symbol of any kind. You may certainly use symbols in your project, but don't stop there. The only other rule is it cannot be a repetition of a project that we have already done as a class. Aside from those two points, the project is limited only by your own creativity.

Some ideas for possible projects:

- ❖ Challenges posted on the website (Rather than extra credit, you can do one for this assignment)
- ❖ A Flash Web Page or banner (button symbols are welcome here)
- ❖ A simple game
- ❖ A short movie (can include your own drawings or digital images)
- ❖ A business card
- ❖ A holiday card or greeting

You will have 5 days in class to complete the assignment. It will count as a major grade. When you are finished, save it with your name in the filename, e.g. DWindsor.Final.flr, and drag it to the class dropbox.
